

# How To Make Bee Garden Art

## Supplies needed

used soup or vegetable tin can  
yellow paint  
black electrical tape  
2 plastic googly eyes  
string or twine 2 black pipe cleaners  
white computer paper or white card stock  
scissors  
glue or glue dots

1. Remove the cans label, wash and dry the tin can.
2. Use a hammer, and screw or nail to make a hole in the middle of the can.
3. Spray paint, or paint the can yellow. Let it dry completely.

4. Using the black tape make 3 stripes around the can.  
Do not cover up your hole in the middle stripe.

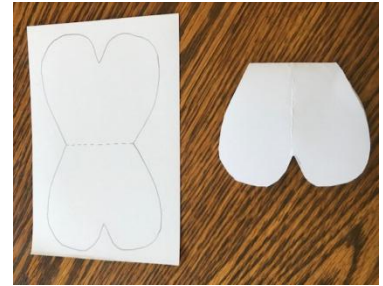

5. Glue the plastic eyes onto the can, with a black marker you can draw on a mouth.

6. Cut your string or twine about 24 inches long. Fold in half and carefully pull both ends at the same time from the outside to the inside of the can. Then tie a knot with the loose ends of the twine.

7. Using the white paper cut out a set of wings. Then fold the wings in half.

8. Make a small hole in the middle of the fold on the wings. Slide the wings down the twine and make a knot at the end next to wings.

9. On each end of the pipe cleaner, roll up a little to make a foot. Then fold the pipe cleaner in half.

10. Glue the legs on the underneath side in the middle of the 1<sup>st</sup> & 3<sup>rd</sup> stripe.

11. Loop the twine over a branch in your yard.
